BUDGETS FOR ADMINISTRATIVE EXPENSES OF DEFENSE PRODUCTION ACTIVITIES

COMMUNICATION

FROM

THE PRESIDENT OF THE UNITED STATES

TRANSMITTING

BUDGETS FOR THE FISCAL YEAR 1953, IN THE AMOUNT OF \$168,360,000, FOR ADMINISTRATIVE EXPENSES OF DEFENSE PRODUCTION AND STABILIZATION ACTIVITIES, AND \$5,000,000 FOR A REVOLVING FUND FOR THE SMALL DEFENSE PLANTS ADMINISTRATION

 J_{UNE} 16, 1952.—Referred to the Committee on Appropriations and ordered to be printed

THE WHITE HOUSE, Washington, June 13, 1952.

The Speaker of the House of Representatives.

Sir: I have the honor to transmit herewith for the consideration of the Congress the budgets for the fiscal year 1953, in the amount of \$168,360,000, for administrative expenses of defense production and stabilization activities, and \$5,000,000 for a revolving fund for the Small Defense Plants Administration.

The details of these proposed appropriations, the necessity therefor, and the reasons for their submission at this time are set forth in the attached letter from the Director of the Bureau of the Budget, with whose comments and observations thereon I concur.

Respectfully yours,

HARRY S. TRUMAN.

Executive Office of the President,
Bureau of the Budget,
Washington, D. C., June 13, 1952.

The President,

The White House.

Sir: I have the honor to submit herewith for your consideration the budgets for the fiscal year 1953, in the amount of \$168,360,000, for administrative expenses of defense production and stabilization

20807—52——1

1

activities, and \$5,000,000 for a revolving fund for the Small Defense Plants Administration. Tentative estimates of \$230,200,000 for administrative expenses, and \$25,000,000 for a revolving fund for the Small Defense Plants Administration, were shown in the 1953 budget as one-line entries.

These proposed appropriations provide for 12 months' operations of agencies having defense production and stabilization functions under legislation now being considered by the Congress. This legislation would continue the authority contained in the Defense Production Act of 1950, as amended, and the Housing and Rent Act of 1947, as

amended, which expire on June 30, 1952.

These activities are being carried out through new agencies, as well as through regular departments and agencies which have been assigned defense production functions. They include general direction of mobilization activities of the executive branch; economic stabilization, including price, rent, wage, and salary controls; materials and production programing, including production controls; provision for meeting the labor needs of defense industry and essential civilian employment under the defense program; and related activities.

Drafts of proposed appropriation language and the details of the various proposals, together with supporting schedules, are set forth in

the attachments to this letter.

I recommend the transmission of these proposed appropriations to the Congress in the amounts specified.

Respectfully yours,

F. J. LAWTON,*
Director of the Bureau of the Budget.

OBLIGATIONS BY ACTIVITIES

Defense materials procurement—1952, \$784,000.

PROGRAM AND PERFORMANCE

Under Executive Order 10281, dated August 28, 1951, the Defense Materials Procurement Agency was created to procure adequate supplies of minerals, metals, and other materials for the defense program. The functions previously performed by the Defense Minerals Administration, Department of the Interior, and certain defense production activities in the General Services Administration were transferred to this Agency. During 1952, administrative expenses of the Agency were derived by transfers of \$400,000 from the Department of the Interior and \$115,000 from the General Services Administration. In addition, \$465,000 of the borrowing authority provided by section 304 (b) of the Defense Production Act will be used to finance development of new overseas minerals sources of supply. During 1953, all expenses of the Agency will be financed from the borrowing authority.

OBLIGATIONS BY ACTIVITIES

Defense mobilization—1951, \$870,345; 1952, \$2,465,000; 1953, \$2,500,000.

PROGRAM AND PERFORMANCE

The Administration formulates and carries out plans and programs for mobilizing domestic surface transportation, storage, and port facilities within the United States, and its Territories and possessions. The agency assembles and analyzes data with respect to the need for domestic transportation and storage and the ability of existing facilities to meet the requirements; coordinates and directs the domestic movement of passenger and freight traffic in cooperation with Government and private transportation organizations and agencies; assigns and administers priorities to insure expeditious movement of essential traffic; presents to the Defense Production Administration estimated requirements for construction, operation, maintenance, and repair materials; presents to the appropriate agencies estimated requirements for manpower; and makes recommendations to the Defense Production Administration in connection with granting accelerated tax amortization and defense loans.

PROGRAM AND PERFORMANCE

The Economic Stabilization Agency is composed of the Office of the Economic Stabilization Administrator, the Office of Price Stabilization, the Office of Rent Stabilization, the Wage Stabilization Board, the Salary Stabilization Board, and the Railroad and Airline Wage Board.

1. Office of the Economic Stabilization Administrator.— The Office of the Economic Stabilization Administrator develops general economic stabilization policies for the guidance of the constituent agencies, and reviews the programs developed to carry such policies into effect.

2. Office of Price Stabilization.—Strong price control measures will continue to be required in fiscal year 1953. Regulations initially issued were necessarily broad in scope, and efforts were immediately begun to develop price techniques and to prepare regulations tailored to fit the individual needs of businesses and industries under price stabilization. This program will be substantially completed in fiscal year 1953. Price controls will continue to be relaxed when it can be determined that such actions are consistent with the attainment of stabilization goals. Commodity areas where regulations may safely be suspended or where reporting requirements may be eased or eliminated will continue to be studied, and prompt action will be taken where warranted. Intensive efforts to improve understanding of regulatory requirements by business generally will continue, in order to achieve maximum voluntary compliance. However, enforcement actions will be taken where necessary, but concentrated in areas where violations would have the most serious impact on the economy. The organization has reached its maxiof approximately 12 percent from its present personnel by the end of fiscal year 1953.

3. Office of Rent Stabilization.—Rent ceilings are established and enforced in defense rental areas and critical defense housing areas. In defense rental areas, which have been under rent control since World War II, new construction, hotels, motels, and tourist courts are exempt from control. In critical defense housing areas, which are established upon joint certification of the Secretary of Defense and the Director of Defense Mobilization, rents on all types of housing accommodations, without exception, are controlled.

4, 5, and 6. Wage Stabilization Board, Salary Stabilization Board, and Railroad and Airline Wage Board.—
Wage and salary control regulations are established and enforced as a part of general economic stabilization. Proposed wage and salary increases are reviewed in the light of equity and their probable effect on economic stabilization. Investigations are conducted to establish facts needed in making wage and salary decisions and in developing regulations. As required by the amended Defense Production Act, a separate board was created during fiscal year 1952 to deal with wages and salaries of employees subject to provisions of the Railway Labor Act. In addition to its regulatory functions, the Wage Stabilization Board has limited responsibilities in the settlement of labor disputes.

The increase requested for 1953 makes provision for (a) reduction of large backlogs of cases before the three

The increase requested for 1953 makes provision for (a) reduction of large backlogs of cases before the three boards, (b) completion of the field organization of the Salary Stabilization Board, and (c) an enforcement staff for the Salary Stabilization Board.

PROGRAM AND PERFORMANCE

The Small Defense Plants Administration carries out a

program to aid and guide small business.

1. Procurement assistance.—Efforts are made to obtain a larger portion of total Government procurement contracts for small-business enterprises. This includes joint determination with the Military Departments and other procurement agencies, of individual contracts to be awarded to small plants; and the issuance of certificates of competency to small business, upon finding that facilities and credit resources are adequate to assure performance on specific contracts. Other major activities include efforts to increase utilization of small plant facilities by subcontracts from large prime contractors, and assistance in the formation of production pools.

SMALL DEFENSE PLANTS ADMINISTRATION-Con.

SALARIES AND EXPENSES—continued

Salaries and Expenses, Small Defense Plants Administration-Con.

2. Financial assistance.—Efforts are made to render financial aid in the form of loans to small business through the Reconstruction Finance Corporation where a fund of \$100,000,000 has been authorized for this purpose. Surveys and studies are carried out with regard to the credit, business standing, and productive ability of each plant for which a loan is requested, and a recommendation is made to RFC concerning the loan.

3. Materials and equipment assistance.—Aid is given small firms in obtaining a fair share of controlled materials and equipment by representing them before National Production Authority and Defense Production Administration Committees and Boards, and by distributing information concerning the availability of materials and

equipment on the open market.

4. Production and management service.—Assistance is provided to small businesses in connection with conversion to defense or essential civilian production, inspection of plants for determination of the adequacy of facilities for defense production, and the establishment of a national inventory of productive facilities. Pamphlets and brochures are prepared for the use of small-business firms to help them solve problems of management or production.

OBLIGATIONS BY ACTIVITIES

For use in connection with the taking of prime contracts from other government agencies and subcontracting the work to small-business concerns—1953, \$40,457,

PROGRAM AND PERFORMANCE

Procurement contracts will be placed with individual small plants by using this revolving fund to take prime contracts from other Government agencies and, in turn, subcontract the work to small business concerns. It is expected to utilize this authority on contracts for items most readily furnished by small plants but which, because of the size or other characteristics of the contract requirements, could not be let directly to individual small business organizations.

A small amount of over-all management and technical costs related to this activity will be borne by this fund, but direct engineering and contract management expenditures will be charged to the prime contracts and recovered from the procurement agencies.

PROGRAM AND PERFORMANCE

Execution of the Defense Production Act requires services of the Administration in two categories: (1) Those provided for functions for which it has Government-wide jurisdiction under the Federal Property and Administrative Services Act of 1949, as amended; and (2) those prescribed by Executive orders issued under the Defense Production Act.

Under the first category are two general services. The first is the provision of office space throughout the United States for occupancy of agencies exercising responsibilities under the Defense Production Act which for 1953 consists of continued operation, maintenance, and utilization control of 372,000 square feet of Government-owned space and an average of 3,111,000 square feet of leased space. The other general service is the daily publication of orders and regulations of defense production agencies, a monthly digest, and a semiannual handbook of their activities.

Under the second category is the function delegated to the Administration for representing Federal agencies in their priority requirements for items of "common use."

PROGRAM AND PERFORMANCE

In the exercise of his authority under the Defense Production Act of 1950, as amended, the Secretary has delegated specific defense production activities as follows:

1. Production and Marketing Administration.—Requirements and supply are determined, and assistance is given in obtaining materials for the necessary production of food. Distribution is made to effect the most efficient utilization of the total food supply. Analyses are made of operating policy and economic conditions in order to make recommendations for the fulfillment of food requirements, and several defense food orders are being administered. This Administration acts as claimant before the Defense Production Administration, the Defense Materials Procurement Agency, the National Production Authority, and other agencies for materials, machinery, fertilizers, and insecticides required in farm production, farm construction, and for food-processing facilities. It reviews and makes recommendations to the Defense Production Administration and other agencies on applications for accelerated tax amortization for food and agricultural facilities and applications of prospective borrowers for use in expanding agricultural and food productive capacity and supply. The agency performs certain functions and powers with respect to storage and warehousing facilities for the Defense Transport Administrator. Recommenda-tions and supporting data relating to manpower are developed for use in presentations to the Department of Labor, Selective Service System, and other agencies. The agency also makes legal minimum price determinations and revisions for the Secretary of Agriculture and is consulted by the Office of Price Stabilization on proposed price ceiling regulations and distribution problems resulting from certain Office of Price Stabilization regulations.

2. Forest Service.—Technical work in the forest industry field is performed for the National Production Authority and other defense agencies including (a) making field investigations and reports on the adequacy of timber resources to support planned expansions as represented by production loan and tax amortization applications; (b) furnishing technical information relating to timber and timber products; and (c) conducting special studies and field surveys to develop information basic to well considered action programs in the field of forest products.

3. Office of Foreign Agricultural Relations.—Information is furnished on foreign production and international trade, including (a) supply estimates on critical food and agricultural commodities available from overseas; (b) effects of export controls on supply abroad; (c) requirements of agricultural machinery, fertilizers, and insecticides needed in foreign countries; and (d) conditions in particular areas such as Asia and Africa to determine the available food supplies and the trade problems of deficit areas and their effects in relation to defense mobilization plans.

4. Bureau of Agricultural Economics.—The Bureau (a)

4. Bureau of Agricultural Economics.—The Bureau (a) prepares data on farm wages and farm labor supply and requirements; (b) develops estimates of production capacities and requirements; and (c) develops basic data on prices and on current and prospective production and supplies of

agricultural products.

5. Legal, informational, and other departmental services.—
The Offices of the Solicitor and Information furnish legal and informational services in connection with defenses production activities, and the Office of the Secretary provides over-all planning, coordination, and integration of the administrative and operational resources of the Department to meet defense objectives.

PROGRAM AND PERFORMANCE

Defense production activities are undertaken by a number of separate agencies within the Department of Commerce. Because a relaxation of production controls is anticipated during fiscal year 1953, the amounts esti-

mated are less than the amounts required during the current fiscal year.

1. National Production Authority.—The Authority (a) determines priorities and allocations and requisitions materials and products to assure that military needs are met and that the remaining supplies are distributed equitably, and (b) develops measures for the expansion of production for national defense.

2. Office of Field Service.—The field offices of the Department administer the various programs of the National

Production Authority at the local level.

3. Office of the Secretary.—The Office provides printing, distribution, and auxiliary services for the National

Production Authority.

4. Industry Evaluation Board.—The Board screens industrial resources, identifying the critical facilities upon which defense mobilization, war production, and essential civilian economy depend. The Board reports its findings to appropriate Government agencies for use in plans, programs, and actions for greater security of the production base, physical plant protection, and the conservation of funds, manpower, equipment, and other essential resources.

5. Office of International Trade.—The Office determines the material requirements of those countries not assisted by the Mutual Security Agency and presents these requirements to the Defense Production Administration.

6. Office of Transportation.—The Office exercises priorities and allocations functions for air and sea transportation delegated to the Secretary and participates in mobilization planning in the field of transportation in cooperation with

other Government agencies.

7. Office of Industry and Commerce.—The Office participates in the Federal industrial dispersion program by providing advice and guidance to local communities in analyzing industrial potential within the framework of military security requirements and economic considerations.

PROGRAM AND PERFORMANCE

The Department is responsible for the defense production programs with respect to solid fuels, electric power, fish products, petroleum, and gas and for encouraging the exploration of critical minerals.

1. Office of the Secretary, Defense Production Staff. Staff support is provided the Secretary in directing and coordinating the defense activities of the Department and in maintaining close working relationships with other

agencies concerned with the defense program.

2. Defense Solid Fuels Administration.—Programs are developed and executed for the production, distribution, and use of all forms of coal and coke made from coal, the production of coal chemicals, and the distribution of petroleum coal, including assistance in obtaining supplies, construction materials, equipment, transportation facilities, and manpower and in increasing production through financial aid. Areas of major current concern are those relating to providing materials for the construction, operation, and maintenance of productive facilities; providing adequate facilities for the transportation of solid fuels to consuming areas; and increases in productive facilities for metallurgical coal and coke-producing facilities to meet the demands of the steel expansion program.

3. Defense Electric Power Administration.—Provision is made for the coordination of the electric power industry's program of expansion so that it will adequately support the defense effort, including assistance in meeting the industry's needs for scarce materials, equipment, and

financial aid.

4. Defense Minerals Exploration Administration.—On the basis of general policy and program directives from the Defense Materials Procurement Agency, this Administration stimulates the production of critical metals needed for national defense through loans for the exploration of possible domestic sources of ores. In 1953, the administrative expenses of this Administration will be met from the borrowing authority provided under the Defense Production Act. This will provide a consistent pattern for financing the administrative expenses of all agencies carrying on programs under sections 302 and 303 of the Defense Production Act.

5. Defense Fisheries Administration.—Support is given to maintaining or increasing the supply of fishery products to meet military and civilian requirements by (a) aiding in the obtaining of supplies and materials required by the fishery industry; (b) encouraging, and advising in connec-

tion with, the expanding of production where appropriate; and (c) advising, and recommending to, other defense agencies in connection with problems of manpower, pricing, financing, and distribution.

6. Petroleum Administration for Defense.—Provision is made for the mobilization of the domestic oil industry and the American oil industry operating abroad, the oil industry of friendly foreign nations, and the domestic gas industry to insure adequate development, distribution, and utilization of resources and facilities to meet civilian and military requirements. Over-all policies on production and distribution of petroleum, petroleum products, and gas are developed, established, and administered through limitation orders or other devices as necessary. Representation is given to the needs of the petroleum and gas industries, and allocations of scarce materials and products are made to those industries. Coordination is provided between the oil and gas industries and other Government agencies.

PROGRAM AND PERFORMANCE

The Department has responsibility for meeting most effectively the labor needs of defense industry and essential civilian employment under the defense program.

1. Office of the Secretary.—Staff services are rendered to national manpower committees, including analysis of recommendations.

2. Defense Manpower Administration.—Direction is furnished in the development of plans, policies, and programs for meeting defense manpower requirements, and continuous appraisal is made of all factors that bear on the manpower program. In addition, coordination is given to the operation of approved programs.

3. Bureau of Labor Standards.—To conserve manpower through industrial accident prevention, special safety programs keyed to high hazard defense operations are in progress; and safety training courses are being conducted for engineers, supervisors, workers, and Federal agencies.

4. Bureau of Apprenticeship.—To meet the needs for

4. Bureau of Apprenticeship.—To meet the needs for industrial skills in the defense production program, training service is provided to defense industry.

ing service is provided to defense industry.

5. Bureau of Employment Security.—Increased emphasis is placed on adjusting employment service procedures to defense manpower requirements; expanding the program for the collection and interpretation of labor market information for all defense manpower usages; emphasis on industrial services to employers connected with defense production to assure the most productive use of manpower; and more frequent contact with State employment service affiliates for training and guidance in promoting the most effective use of manpower in labor shortage areas and in methods of alleviating problems in labor surplus areas.

6. Bureau of Labor Statistics.—To provide data on manpower needs of the defense program, projections of labor requirements are prepared for munitions and defense-supporting industries and for key occupations; employment, hours, and capacity utilization of the critical metalworking industries are analyzed at the request of the National Production Authority; and data are developed through the Bureau of the Census regarding the working-age population essential to manpower analysis.
